How do lenses work? | What are the different types of lens?

Web Dec 15, 2021 · What are lenses? A lens is a transparent piece of glass or plastic with at least one curved surface It gets its name from the Latin word for "lentil" (a type of pulse used in cooking), but don't let that confuse you There's no real reason for this other than that the most common kind of lens (called a convex lens) looks very much like a lentil!
